I just wish these so called law makers understand that they are employed by the tax payers! XM Radio is the best thing that has happened for the public and transportation industry. The weather and traffic are the most important factors especially if your in the transportation industry as i am. The traffic and weather station on xm can give people information that could save their life and help not to be a problem in a traffic situation such as accidents and things of that nature, with xm they could get the information in plenty of time to divert their direction and not become part of a traffic or any other problem! This country is based on free enterprize so the other people trying to keep xm from having the weather and traffic on their schedule list is wrong and should not be tolerated! We as customers have payed for this service and no one should be able to take this away just because it may hert their business! I think they need to find something else to market and do a good job like xm> Then they would not have to worry about losing listeners! Its all marketing and catering to the audience! XM has ans is doing a great job! The wheel isn't broken so don't try to fix it! Thank you!
